

Q-CityMap is an easy-to-use-web mapping site that provides the tools you need to create your own maps and reports, view and print the City's spatial and attribute data, orthophotos and the Cariboo Regional District's base data . The Q-CityMap link: <http://www.quesnel.ca/Mapping-Splash.html>.

The Q-CityMap is only supported on Internet Explorer.

SEARCH TOOL

Find the search bar on the upper-right side of your screen. Enter the information you are searching for. The search results will show up in the panel on the left side of your screen. Click in the white space of the result you want to zoom the map to that area. For more information on that area, click on the blue result text in the results to pop up an information panel.

For a successful search result, format your search data to the following:

Civic Address and Street Name - Type street number and then street name. Do not include street type, i.e., 410 Kinchant.

If you enter just the street number, results will include every parcel that includes that number, i.e., 410 is searched and 1410 will be included in the search results.

Property Identification Number (PID) - Enter the PID number with dashes, i.e., 008-992-885.

Folio/Roll Number - Enter the folio/roll number without periods or dashes, i.e., 47005862180.

HELP BUTTON

Located beside the search bar. Use this button if you have any questions regarding the Q-City Map. This will explain, in-depth, on how to navigate and use this application while teaching fundamental mapping skills.

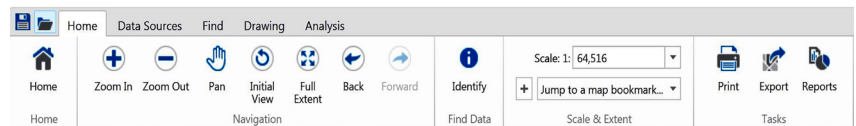

HOME TAB - Contains a standard set of tools that are most common and widely used to the site.

Zoom In/Out – Use your mouse wheel to zoom in/out or use the + and – buttons on the menu. To pan: while pressing the spacebar on your keyboard, use your mouse to click and drag the map or use the hand button located on the menu.

Identify – Click this button and then onto any of the layers in the map to find more information. It will show all the attributes in the GIS table for that layer.

Map Scale – Can be changed by highlighting the current scale and typing in what map scale is desired or select a pre-chosen scale from the drop down menu.

Jump to a Map Bookmark – Several areas have been bookmarked for fast searches. By clicking the plus button beside this you can add your own custom bookmarks.

Print - Select the Print button. Choose your preferred options.

Export - This tool gives you the ability to export your map image into several different formats that can be used in other programs.

Reports - These reports have been created to show all legal information and a highlighted image of the parcel. Reports are only available for parcels located within the City of Quesnel.

DATA SOURCES

Add – This button allows the ability to add additional Map Services to the current service.

Google/Bing - These buttons will take the map site to that service. If the synchronize button is checked on, it will go to that service exactly at the same location as in the Q-City Map page.

FIND TAB

The Find tab contains tools that are used to select a property or many properties. The Display for... button contains the "active" layer drop-down list. The Query and Result feature tools are also found here.

DRAWING TAB

The Drawing tab holds all of the tools required to draw lines and add text to simply markup your map.

ANALYSIS TAB

The Measurement Info tool allows for setting the unit of measure for area and distance. The New button allows manual entry of X and Y coordinates which can be either added to the map or used to 'pan to the coordinate' if it is known. The Plot button will place the coordinate on the map.
